

Davide Morgante

Education

- 2021- **PhD**, *University of Milan*, Milan.
PhD Student under the supervision of prof. Antonio Amariti.
- 2019-2021 **M.Sc.**, *Sapienza University of Rome*, Rome, *110 with Honors*.
Master degree in theoretical high energy physics
- 2016-2019 **B.Sc.**, *Sapienza University of Rome*, Rome, *110 with Honors*.
Bachelor degree in physics.

Bachelor Thesis

- Title *Semiclassical transition amplitudes. (original: Ampiezze semiclassiche di transizione.)*
- Advisor Prof. Guido Martinelli
- Short description In my bachelor thesis I analyzed the transition probability of a metastable state for a generic scalar field theory, in the semiclassical limit. In the thesis I also gave the theoretical basis upon which the transition probability was calculated, namely: Feynman path integral formulation, quantum tunneling and classical field theory arising from the collective excitation of a system with many degrees of freedom.

Master Thesis

- Title Unitarity triangle analysis and recent theoretical advancements on ϵ'/ϵ
- Advisor Prof. Guido Martinelli
- Co-advisor Prof. Marco Nardecchia
- Short description In my master thesis I worked on the UT analysis of the ϵ'/ϵ parameter in the $K \rightarrow 2\pi$ decay starting from the recent result from R.Abbott et al. (arXiv:2004.09440v2).

Experience

- 2022 **Teaching Assistant**, *University of Milan*, Milan.
I did TA for the course of Mathematical Methods for Physics held in Unimi. My duties included extra tutoring classes, office hours and lectures.
- 2022 **Teaching Assistant**, *University of Milan*, Milan.
I held the course of introductory math for the freshman of the physics bachelor at the University of Milan.

Schools and Conferences

- 21-27 August 2022 **CERN Winter School on Supergravity, Strings and Gauge Theory 2022**, *Geneva*.
Participating at the CERN school on Supergravity, Strings and Gauge theories. The main topics covered have been: conformal bootstrap, higher symmetries and defects, spectral theory for gauge and string theory, flux compactifications, holography.
- 12-15 June 2022 **Theory of Fundamental Interactions INFN conference**, *Venice*.
Participating at the INFN conference Theory of Fundamental Interactions.
- 9-13 May 2022 **ICTP Spring School on Superstring Theory and Related Topics**, *Trieste*.
Participating at the ICTP Spring School on Superstring Theory and Related Topics. The main topics covered have been: celestial holography, non-invertible symmetries, topological aspects of string theory and strings in AdS_3 .
- 23-25 March 2022 **Iberian Strings 2022**, *Gijón*.
Participating at the conference school "Iberian Strings 2022"

Highlights

- 2020 **Honours Program**, *Sapienza University, Rome*.
The Honours Programme is an advanced course providing additional training to the normal study programme. For this program, I followed an additional course at Tor Vergata University held by prof. Raffaele Savelli on group theory, representation theory of finite and Lie groups.
- 2020 **Student Collaboration Scholarship**, *Sapienza University, Rome, SoRT*.
I won one of the 39 collaboration scholarships at the Physics department of Sapienza. All informations can be gathered from the official page <https://www.uniroma1.it/en/pagina/student-collaboration-scholarships>
- 2017 **Member of the Italian Physical Society, SIF**.
I was invited to be a member of the Italian Physical Society (SIF) in my high-school for my results in the physical sciences.

Languages

Italian	Mother tongue
English	Overall C2 level
French	Overall A2 level

Computer skills

Programming languages	C, C++, Python	Libraries: ROOT, Geant4, Scikit-learn, TensorFlow
Data analysis	R, Gnuplot	
Writing	Office package, LaTeX	
Misc	Basic knowledge of machine learning	

Signature
